One-touch push button switch

HEPA filter

Capsule type

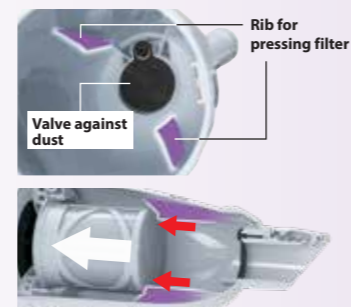

Dust capacity

730 mL

Improved dust-resistance

When capsule is installed securely, two ribs inside capsule press the inside frame of filter to hold the filter tight.

DCL286F

One-touch push button switch

Easy filter setting
Filter can be fixed with a single push.

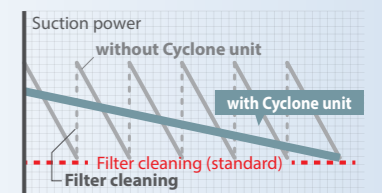

Integrated cyclone unit

Dust capacity

250 mL

Integrated Cyclone unit

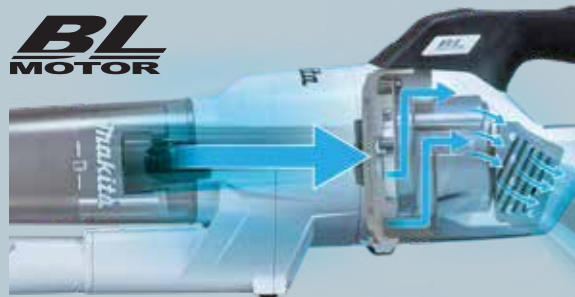

The filter is less clogged due to separation of fine dust through a cyclone air flow, reducing the decrease in vacuum power of cleaner.

the amount of dust that can be sucked before filter maintenance

High suction power and Low noise level

- Achieved by redesigning the exhaust air flow path of the motor to reduce wind noise.
- Equipped with high-speed BL motor to ensure high suction power.

Low Noise	
DCL284F	65 [Mode 4] dB(A)
DCL286F	66 [Mode 4] dB(A)

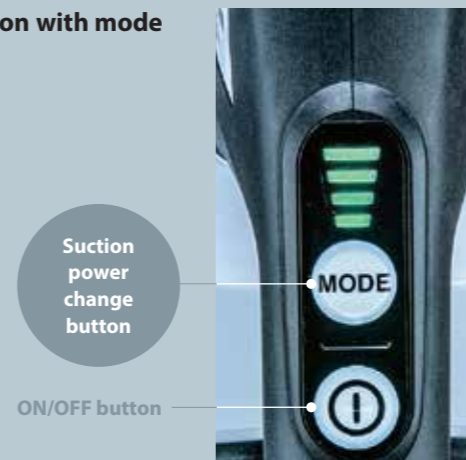

Redesigned Floor/ Carpet T-nozzle

- Redesigned structure reduces the resistance caused by suction, providing smooth running.
- Redesigned inside air flow path reduces the noise made inside the nozzle.

4-suction power mode selection with mode memory function
(DCL284F / DCL286F)

- The cleaner can memorize a previous power mode and resume vacuuming at the same mode as last time user turned off for user convenience.
- Power mode can be selected before the cleaner is turned on.

Single LED job light

also functions as a battery capacity warning lamp.

Pipe locking mechanism

Pipe is fixed with the locking mechanism to prevent it from accidentally coming off.

Pipe with beveled end

Cleaning of tight places can be done without nozzle by using the beveled end of pipe as a nozzle.
