Lightweight design

Improved trimming performance

The performance to guide twig/branch towards blade tooth has been improved by:

- shortening the length covered by blunt extension
- tapering the tip of blunt extension

XPT
eXtreme Protection Technology

Chip receiver (option)

can make it easier for user to collect leaf and twig debris, thanks to:

- Lower height of the connecting levers
- Reduced step height of the edge of the chip catching plate

Highly durable crank mechanism

Increased crank wall thickness can:

- reduce the chance of falling off of the blade from the crank.
- increase the contact area between the crank and blade, reducing wear of the crank.

Easy-to-press front switch lever

Front switch lever has been redesigned to be easily pressed even when it is gripped at the side.
