# High efficiency, High durability, High power

## Smooth and efficient trimming

- The output power and number of strokes have been increased compared with our 18V models, achieving smooth and efficient trimming.
- Constant speed control suppresses rotation drop to enable stable trimming.

**BL MOTOR**

## Blade type

Single-sided blade with obliquely-angled and triple-ground teeth

With excellent branch introduction and a design that prevents branches from escaping, the blades smoothly capture branches, allowing for trimming without letting branches escape.

UH020G Blade length: 500mm

## Lightweight design

The guide bar is made of aluminum to make the front of the tool lighter for reducing user fatigue.

## Highly durable crank mechanism

Increased crank wall thickness can:

- reduce the chance of falling off of the blade from the crank.
- increase the contact area the blade, reducing wear of the crank.

## Reverse function to clear jams

When the shear blades are jammed with branches, the shear blades are reversed for a moment to clear the jam by pressing the Reverse button and then pulling the trigger.

## Redesigned, easy-to-press switch lever

can be pressed without gripping the front handle deep in your palm, allowing for easy control.

## XPT / IPX4 -compatible

High water-resistance allows the user to operate the tool even if it is wet with water.
