DLM539 / DLM480

Predecessor model

Higher mowing performance

The blade is designed so that it tilts towards the front side of the mower when attached, preventing double-cutting for reduced current consumption.

Optimum blade design for less rotational speed reduction of the blade

Improved grass collection efficiency

achieved by re-designing the inside of the deck to a streamlined shape

Water-resistant cutting deck

The inside is washable; however, self-propelled unit should be kept dry.

Self-propelled type (with suction power control)

DML539 only

• On/off switch lever for self-propelled function

• Self-propelled speed: 2.5-5.0km/h

Vertical storage

Compact storage of grass catcher allows for space-saving vertical storage

XPT

IPX4-rated water-resistance
